Michael Ludwig

IT Professional

Belchertown, Massachusetts, United States

Summary

My career history starts out back in 1993 when I graduated high school with a vocational certificate in Drafting and Design. I went to college part time and after 4 years of work and school took time off to decide what direction I needed to go in. I joined the U.S. Army in January of 1998 and was trained as a Electronic Switching Systems Operator/Maintainer, and was assigned to the 82nd Signal BN. I was honorably discharged in January 2002 and immediately began attending night classes for Telecommunications, so as to free up my daytime to look for a job. I was also continuing my service in the North Carolina National Guard as a commo-chief at the Butner, NC Armory. After the spring semester with no job prospects in sight I enrolled in day class during the summer, and in the fall of 2002 I switched my major to Information Systems Network Administration and Support. After the fall/spring 2002 - 2003 year I attended summer classes and decided to transfer to a combat arms unit in Southern Pines, NC. I left school and retrained to be an Armor Tanker Crewmember and was mobilized in October of 2003. I deployed to Iraq in February of 2004 and in July 2004 was medi-vaced to Germany and then to Fort Bragg where I stayed in the medical holdover program receiving care and working as a supply technician. I was medically discharged in July 2005 and started back in my major at school. I graduated in May 2006 with an A.A.S., 2 Diplomas, and 4 certificates. After working at 3 jobs that really didn't fit I found a job on Fort Bragg working with Centurum Information Technology, there I worked as a Desktop Support Technician until November 2009 when my billet was canceled. I then worked for Pomeroy IT Solutions in 2010, and then I got an opportunity to work at DellEMC in September of 2010 until I was dismissed in July 2016. I tried to start my own consulting business and since moved on to work in Information Assurance and IT Customer Support with the O.I.T. and Nuvisons working for Western Carriers.

Experience

Bio-Techne/Impact Global (Field Nation)

Help Desk Support Specialist

December 2023 - April 2024 (5 months)

Devens, Massachusetts, United States

Provided emergency IT support for 1st, 2nd, and 3rd level service requests reported to the helpdesk. Assessed, triaged, researched, and resolved service requests regarding the use of application software products and/or infrastructure components. Installed and tested computer systems and peripherals within established standards and guidelines. Interacted with application software and operating systems to diagnose and resolve unique, non-recurring problems. Competencies to focus on: Infrastructure Design, Configuration Management, Information Technology Performance and Assessment. It was also my responsibility to report, respond to and resolve customer requests and apply information security and information assurance policy, principles, and practices. Trained on HIPAA compliance for the work that I was to perform. Provided lab equipment support to lab personal. Working with OKTA, AD, SCCM, InTune, JAMF, ScreenConnect, Azure, and Autopilot. Responsible for training the new hire as part of my assigned duties while covering the Waltham and Devens locations.
